

Guillotine Squaring Shears

TREADLE OPERATED

This machine is used for accurately cutting and trimming sheet metal, wood veneer, masonite, cardboard, rubber, cloth etc. and is manufactured from high quality cast iron, machined and fitted within close limits to ensure maximum rigidity and easy operation.

Side gauges, back gauges with fine adjustments, front gauges and extension arms are provided as standard equipment with this machine.

A standard feature of this guillotine is the tungsten steel edged blade which gives very long life between regrinds.

Spare cutting blades and machine parts are available from stock.
